

**UNITED STATES DISTRICT COURT  
FOR THE WESTERN DISTRICT OF TEXAS  
WACO DIVISION**

**AERITAS, LLC,**

Plaintiff

v.

**CATHAY PACIFIC AIRWAYS LTD**

Defendant

**Case No. 6:20-cv-00141**

**JURY TRIAL DEMANDED**

**COMPLAINT FOR PATENT INFRINGEMENT**

Plaintiff Aeritas, LLC (“Aeritas” or “Plaintiff”) files this Complaint for patent infringement against Cathay Pacific Airways LTD (“Defendant”), and alleges as follows:

**NATURE OF THE ACTION**

1. This is an action for patent infringement arising under 35 U.S.C. § 1 *et seq.*

**PARTIES**

2. Aeritas is a limited liability company organized and existing under the laws of the State of Texas with its principal place of business in Dallas, Texas.

3. Upon information and belief, Cathay Pacific Airways LTD is a foreign corporation.

## JURISDICTION AND VENUE

4. This Court has original jurisdiction over the subject matter of this action pursuant to 28 U.S.C. §§ 1331 and 1338(a).

5. Upon information and belief, Defendant is subject to personal jurisdiction of this Court based upon it having regularly conducted business, including the acts complained of herein, within the State of Texas and/or deriving substantial revenue from goods and services provided to individuals in Texas and in this District.

6. Venue is proper in this District under 28 U.S.C. § 1400 because Defendant has committed acts of infringement and has regular and established places of business in this judicial district.

### **OVERVIEW OF THE CATHAY PACIFIC APP**

7. Defendant provides for its customers use the Cathay Pacific App, which is available for use with iOS and Android devices:

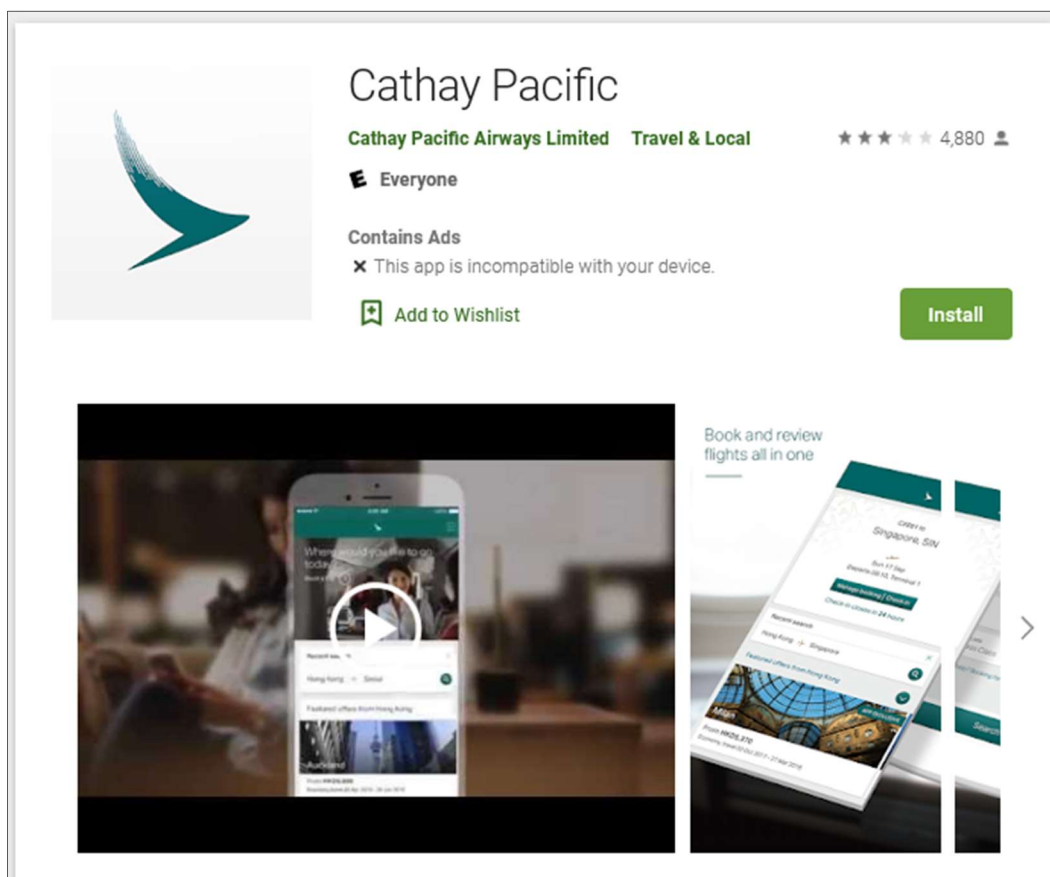

Cathay Pacific app lets you book, plan and manage your trips all in one place. On your personalised home screen, you will always see your upcoming flights and what you can do next. You can also search our flight timetable, book your flight, check in, choose your seat, get your boarding pass, check your baggage allowance, view your departure times, and get details of any connecting flights – all with a few taps.

## What's New

We've enhanced the message center making it easier to view travel reminders and your latest flight updates within the new notification hub. Simply tap the "bell" icon on the home screen to explore more. Also be sure to subscribe to flight notifications in settings to receive important updates during disruptions.

<https://apps.apple.com/us/app/cathay-pacific/id305038764>

Cathay Pacific app lets you book, plan and manage your trips all in one place. You can search our flight timetable, book your flight, check in, choose your seat, get your boarding pass, check your baggage allowance, view your departure times, and get details of any connecting flights – all with a few taps.

We're bringing you an all-new home screen! Now, you'll always see your upcoming trips and what you can do next. We've also saved the journey you last searched so you can tap and get the latest results. You can even browse special offers selected for your location, and book them on the app as well. Give it a try now.

**App-exclusive offers**

access to flight deals and extra travel bonuses exclusive for app users only

**New special fares**

added a variety of special offers, such as early-bird, group deals, and more

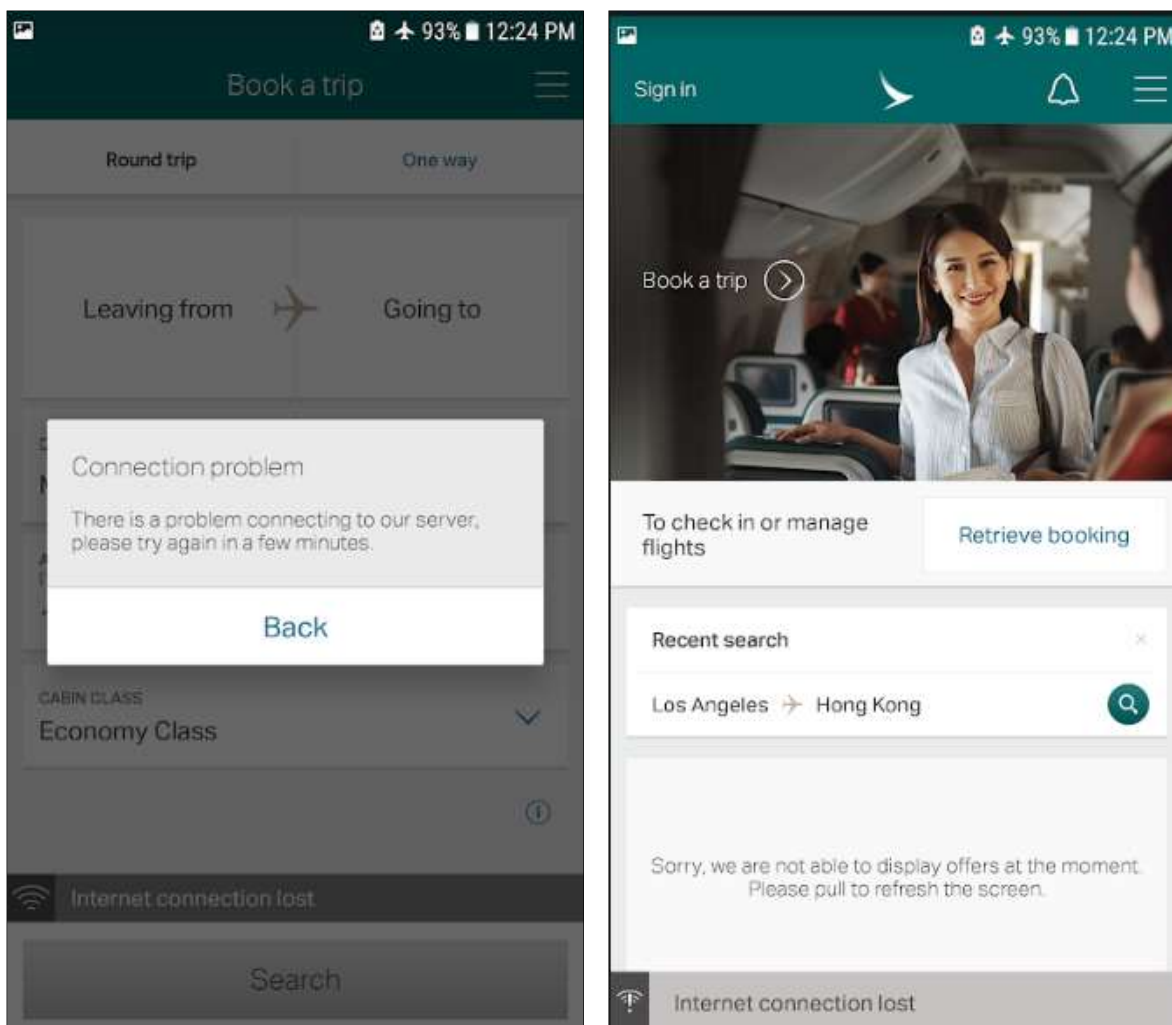

**One tap to pre-fill with stored travel documents**

members and Registered users can easily get their travel document details pre-filled during booking and check-in

Supported languages: English, Traditional Chinese, Simplified Chinese, Japanese, Korean, French, Italian, German, Dutch, Malay, Indonesian, Thai

[https://play.google.com/store/apps/details?id=com.xs2theworld.cxmobile&hl=en\\_US](https://play.google.com/store/apps/details?id=com.xs2theworld.cxmobile&hl=en_US)

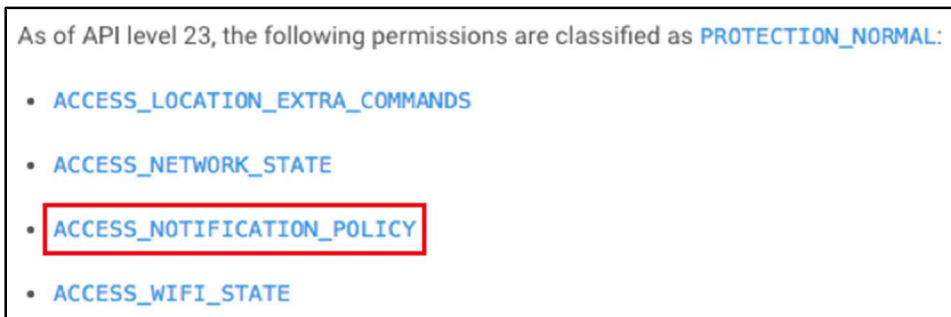

The Cathay Pacific App requires a connection to a server in order to operate:

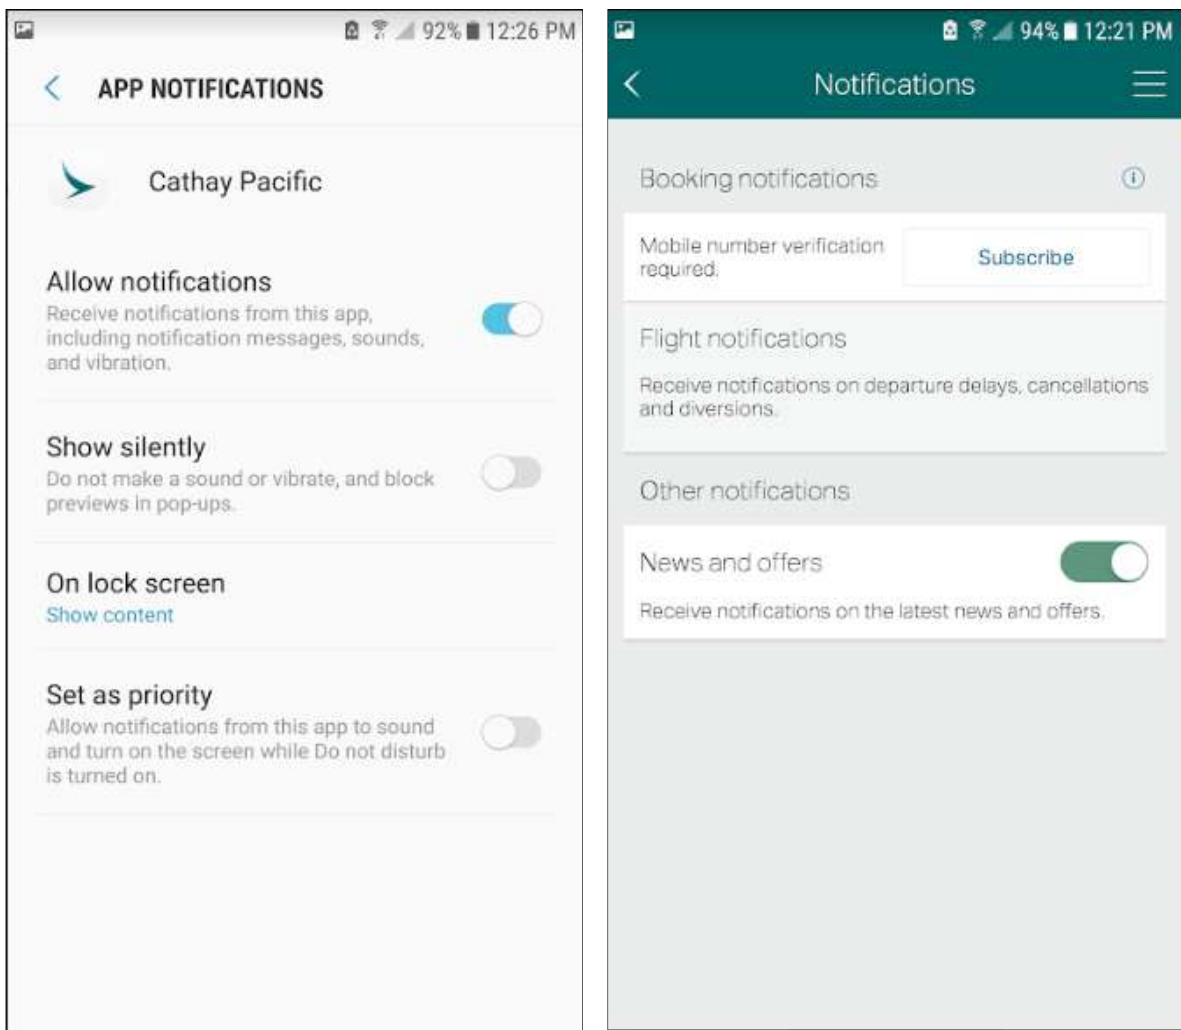

The Cathay Pacific App provides notifications to the user:

- If the device is running Android 6.0 (API level 23) or higher, and the app's `targetSdkVersion` is 23 or higher, the app requests permissions from the user at run-time. The user can revoke the permissions at any time, so the app needs to check whether it has the permissions every time it runs. For more

**COUNT I**  
**(Infringement of U.S. Patent No. 7,706,819)**

8. Aeritas incorporates paragraphs 1 through 7 as though fully set forth herein.

9. Plaintiff is the owner, by assignment, of U.S. Patent No. 7,706,819 (the “’819 Patent”), entitled MIXED-MODE INTERACTION, which issued on April 27, 2010. A copy of the ’819 Patent is attached as Exhibit PX-819.

10. The ’819 Patent is valid, enforceable, and was duly issued in full compliance with Title 35 of the United States Code.

11. Defendant has been and is now infringing one or more claims of the ’819 Patent under 35 U.S.C. § 271 by making and using the Cathay Pacific App with users’ iOS and Android devices in the United States without authority.

12. Defendant has also infringed the ’819 Patent by encouraging users of the Cathay Pacific App to use the user’s iOS or Android devices with the Cathay Pacific App to practice the claims of the ’819 Patent. Defendant has notice of the ’819 Patent at least as of the date of service of this complaint.

13. Claim 1 recites:

1. A method comprising:  
  
receiving spoken input from a wireless communication device;  
  
obtaining data identifying a current location of the wireless  
  
communication device;  
  
based on the current location of the wireless communication  
  
device and the spoken input, retrieving information;

delivering, to the wireless communication device by a notification server, a non-verbal response to the spoken input, the non-verbal response based on the retrieved information and including a drill-down menu by which additional information related to the retrieved information can be obtained; and

providing additional information related to the retrieved information in response to receipt of at least one additional input provided via the drill-down menu.

14. More particularly, Defendant infringes at least claim 1 of the '819 Patent. Defendant receives spoken input from a wireless communication device (e.g., when a user searches for a location or specific airport using voice input). Defendant obtains data identifying the current location of the mobile device (e.g., as evidenced by permissions required to access the device's location and subsequent provision of location-based information). Based on the location and the spoken input, Defendant retrieves information (e.g., the nearby airport subject to the voice search). Defendant delivers to the wireless device by a notification server, a non-verbal response to the spoken input, the non-verbal response based on the retrieved information and including a scroll-down menu by which additional information related to the retrieved information can be obtained (e.g., the nearby airport subject to the voice search). Defendant provides additional information related to the retrieved information in

response to receipt of at least one additional input provided via the scroll-down menu (e.g., price, availability and other flight information).

15. Aeritas has been damaged by Defendant's infringing activities.

**COUNT II**  
**(Infringement of U.S. Patent No. 10,362,160)**

16. Aeritas incorporates paragraphs 1 through 7 as though fully set forth herein.

17. Plaintiff is the owner, by assignment, of U.S. Patent No. 10,362,160 (the "160 Patent"), entitled MIXED-MODE INTERACTION, which issued on July 23, 2019. A copy of the '160 Patent is attached as Exhibit PX-160.

18. The '160 Patent is valid, enforceable, and was duly issued in full compliance with Title 35 of the United States Code.

19. Defendant has been and is now infringing one or more claims of the '160 Patent under 35 U.S.C. § 271 by making and using the Cathay Pacific App with users' iOS and Android devices in the United States without authority.

20. Defendant has also infringed the '160 Patent by encouraging users of the Cathay Pacific App to use the user's iOS or Android devices with the Cathay Pacific App to practice the claims of the '160 Patent. Defendant has notice of the '160 Patent at least as of the date of service of this complaint.

21. Claim 1 recites:

1. Apparatus, comprising:

a processor;

computer memory holding computer program instructions to:

receive first data indicating a permission to provide a mobile device user a notification, the notification having an associated notification criteria;

at a given time, receive information identifying a determined location of a mobile device;

based at least in part on a determined location of the mobile device and the notification criteria, to provide to the mobile device the notification, the notification being associated at the mobile device with one of: an audible, visual and tactile alert;

receive second data as a result of an input being received at the mobile device following the notification;

retrieve information associated with the input and the determined location of the mobile device; and

provide to the mobile device a response to the input, the response based on the retrieved information.

22. More particularly, Defendant infringes at least claim 1 of the '160 Patent. On information and belief, Defendant employ a processor and computer memory holding computer program instructions to perform the functions described herein. Defendant receives information indicating that the user has provided permission to provide notifications to the user. Defendant asks for permission to obtain the user's location and obtains the user's location if permission is granted.

When location access is granted, the Defendant provides a notification to the user, based on the location, alerting that the user can check into a flight, that there is a delay, a flight cancelation, or a change in departure location. Defendant receives additional data in the form of touchscreen input when the user responds to the notification, which launches a page corresponding to the notification. Defendant then displays a relevant page and provides additional information related to the notification.

23. Aeritas has been damaged by Defendant's infringing activities.

**COUNT III**  
**(Infringement of U.S. Patent No. 9,390,435)**

24. Aeritas incorporates paragraphs 1 through 7 as though fully set forth herein.

25. Plaintiff is the owner, by assignment, of U.S. Patent No. 9,390,435 (the "435 Patent"), entitled MIXED-MODE INTERACTION, which issued on February 6, 2018. A copy of the '435 Patent is attached as Exhibit PX-435.

26. The '435 Patent is valid, enforceable, and was duly issued in full compliance with Title 35 of the United States Code.

27. Defendant has been and is now infringing one or more claims of the '435 Patent under 35 U.S.C. § 271 by making and using the Cathay Pacific App with users' iOS and Android devices and servers in the United States without authority.

28. Defendant has also infringed the '435 Patent by encouraging users of the Cathay Pacific App to use the user's iOS or Android devices with the Cathay

Pacific App to practice the claims of the '435 Patent. Defendant has notice of the '435 Patent at least as of the date of service of this complaint.

29. Claim 1 recites:

1. Apparatus, comprising:

a processor;

computer memory holding computer program

instructions to:

receive first data indicating a permission to provide  
a mobile device user a notification, the notification having  
an associated notification criteria;

at a given time, determine a location of a mobile  
device;

based at least in part on a determined location of  
the mobile device and the notification criteria, to provide  
to the mobile device the notification, the notification being  
associated at the mobile device with one of: an audible,  
visual and tactile alert;

receive second data as a result of an input being  
received at the mobile device following the notification;

retrieve information associated with the input and  
the determined location of the mobile device; and

provide to the mobile device a response to the  
input, the response based on the retrieved information.

30. More particularly, Defendant infringes at least claim 1 of the '435 Patent. On information and belief, Defendant employs a processor and computer memory holding computer program instructions to perform the functions described herein. Defendant receives information indicating that the user has provided permission to provide notifications to the user. Defendant asks for permission to obtain the user's location and obtains the user's location if permission is granted. When location access is granted, the Defendant provides a notification to the user, based on the location, alerting that the user can check into a flight, that there is a delay, a flight cancelation, or a change in departure location. Defendant receives additional data in the form of touchscreen input when the user responds to the notification, which launches a page corresponding to the notification. Defendant then displays a relevant page and provides additional information related to the notification.

31. Aeritas has been damaged by Defendant's infringing activities.

**COUNT IV**  
**(Infringement of U.S. Patent No. 9,888,107)**

32. Aeritas incorporates paragraphs 1 through 7 as though fully set forth herein.

33. Plaintiff is the owner, by assignment, of U.S. Patent No. 9,888,107 (the "107 Patent"), entitled MIXED-MODE INTERACTION, which issued on February 6, 2018. A copy of the '107 Patent is attached as Exhibit PX-107.

34. The '107 Patent is valid, enforceable, and was duly issued in full compliance with Title 35 of the United States Code.

35. Defendant has been and is now infringing one or more claims of the '107 Patent under 35 U.S.C. § 271 by making and using the Cathay Pacific App with users' iOS and Android devices in the United States without authority.

36. Defendant has also infringed the '107 Patent by encouraging users of the Cathay Pacific App to use the user's iOS or Android devices with the Cathay Pacific App to practice the claims of the '107 Patent. Defendant has notice of the '107 Patent at least as of the date of service of this complaint.

37. Claim 5 recites:

5. Apparatus, comprising:

a processor;

computer memory holding computer program instructions to:

receive first data indicating a permission to provide a mobile

device user a notification, the notification having an  
associated notification criteria;

at a given time, determine a location of a mobile device;

based at least in part on a determined location of the mobile

device and the notification criteria, to provide to the mobile

device the notification, the notification being associated at

the mobile device with one of: an audible, visual and tactile  
alert;

receive second data as a result of an input being received at the mobile device following the notification;  
retrieve information associated with the input and the determined location of the mobile device; and  
provide to the mobile device a response to the input, the response based on the retrieved information;  
wherein the computer program instructions comprise a rules engine that comprises first and second components, a first component that evaluates the notification criteria, and a second component that executes notification rules.

38. More particularly, Defendant infringes at least claim 5 of the '107 Patent. On information and belief, Defendant employs a processor and computer memory holding computer program instructions to perform the functions described herein. Defendant receives information indicating that the user has provided permission to provide notifications to the user. Defendant asks for permission to obtain the user's location and obtains the user's location if permission is granted. When location access is granted, the Defendant provides a notification to the user, based on the location, alerting that the user can check into a flight, that there is a delay, a flight cancelation, or a change in departure location. Defendant receives additional data in the form of touchscreen input when the user responds to the notification, which launches a page corresponding to the notification. Defendant then displays a relevant page and provides additional information related to the

notification. Upon matching flight notification with the user's saved flight based on location, the Defendant provides a visual notification based on a rules engine evaluating notification criteria.

39. Aeritas has been damaged by Defendant's infringing activities.

**COUNT V**  
**(Infringement of U.S. Patent No. 8,620,364)**

40. Aeritas incorporates paragraphs 1 through 7 as though fully set forth herein.

41. Plaintiff is the owner, by assignment, of U.S. Patent No. 8,620,364 (the "364 Patent"), entitled MIXED-MODE INTERACTION, which issued on December 31, 2013. A copy of the '364 Patent is attached as Exhibit PX-364.

42. The '364 Patent is valid, enforceable, and was duly issued in full compliance with Title 35 of the United States Code.

43. Defendant has been and is now infringing one or more claims of the '364 Patent under 35 U.S.C. § 271 by making and using the Cathay Pacific App with users' iOS and Android devices in the United States without authority.

44. Defendant has also infringed the '364 Patent by encouraging users of the Cathay Pacific App to use the user's iOS or Android devices with the Cathay Pacific App to practice the claims of the '364 Patent. Defendant has notice of the '364 Patent at least as of the date of service of this complaint.

45. Claim 1 recites:

1. Apparatus, comprising:  
  
a processor;

computer memory holding computer program instructions to execute a rules engine that correlates data identifying a location of a mobile communication device, consumer interest data, data associated with one or more inventory attributes, and notification criteria that defines when a notification is to be delivered to the mobile communications device and a type of such notification, and to generate a message for delivery to the mobile communication device if at least one matching rule in the rules engine is triggered and the notification criteria are met, the message identifying one or more suppliers in the location with inventory that a user of the mobile communication device has expressed an interest in as indicated by the consumer interest data; and

computer memory holding computer program instructions executed by the processor to selectively deliver the message to the mobile communications device according to the notification criteria.

46. More particularly, Defendant infringes at least claim 1 of the '364 Patent. On information and belief, Defendant employs a processor and computer memory holding computer program instructions to perform the functions described herein. Defendant receives information indicating that the user has provided

permission to provide notifications to the user. Defendant asks for permission to obtain the user's location and obtains the user's location if permission is granted. When location access is granted, the Defendant obtains the user's location. Defendant stores consumer interest items such as booked flights and tracked flights. Defendant stores data associated with available inventory, such as whether a flight is available on a certain date, etc. Defendant stores notification criteria to define when notifications are to be delivered to the user including the type of notification. Defendant utilizes a rules engine to evaluate when notification criteria are met. If the notification criteria are met, Defendant generates a message to be delivered to the user. The message identifies a supplier, such as an airport in the location of interest to the user. If the appropriate criteria are met, Defendant delivers the message to the user.

47. Aeritas has been damaged by Defendant's infringing activities.

**COUNT VI**  
**(Infringement of U.S. Patent No. 7,933,589)**

48. Aeritas incorporates paragraphs 1 through 7 as though fully set forth herein.

49. Plaintiff is the owner, by assignment, of U.S. Patent No. 7,933,589 (the "589 Patent"), entitled METHOD AND SYSTEM FOR FACILITATION OF WIRELESS E-COMMERCE TRANSACTIONS, which issued on April 26, 2011. A copy of the '589 Patent is attached as Exhibit PX-589.

50. The '589 Patent is valid, enforceable, and was duly issued in full compliance with Title 35 of the United States Code.

51. Defendant has been and is now infringing one or more claims of the '589 Patent under 35 U.S.C. § 271 by making and using the Cathay Pacific App with users' iOS and Android devices in the United States without authority.

52. Defendant has also infringed the '589 Patent by encouraging users of the Cathay Pacific App to use the user's iOS or Android devices with the Cathay Pacific App to practice the claims of the '589 Patent. Defendant has notice of the '589 Patent at least as of the date of service of this complaint.

53. Claim 39 recites:

39. A method for facilitating a wireless transaction, comprising:

at a first time, receiving a transaction request from a transaction requester using a wireless communications device, the transaction request associated with a wireless transaction defined by an authorization with respect to a product or service, and a multi-stage fulfillment action associated with the authorization, the fulfillment action including personal bodily access into a physical location or structure using the wireless communication device;

transmitting, to said wireless communication device, a transaction code in response to the authorization of the transaction request, the transaction code being a two dimensional (2D) image that encodes information in two dimensions and is configured such that it is capable of

being output from the wireless communication device and optically scanned for authorizing the given action;

at a second time distinct from the first time, and only if it is determined at the second time that a user of the wireless communication device is authorized to use the transaction code transmitted to the wireless communication device to facilitate the wireless transaction, optically scanning the transaction code from the visual display of the wireless communication device to partially complete the wireless transaction; and

at a third time distinct from the first time and the second time and while the wireless transaction remains only partially complete, optically scanning the transaction code from the visual display of the wireless communication device to complete the wireless transaction and authorize personal bodily entry into the physical location or structure.

~~54.~~ More particularly, Defendant infringe at least claim 39 of the '589 Patent. On information and belief, when used, the Cathay Pacific mobile app receives a transaction request associated with the reservation and purchase of a boarding pass for air travel. The mobile boarding pass provides for personal bodily access to the secured area of an airport in order to board the plane for travel. The mobile boarding pass includes a two-dimensional bar code image, which is displayable by the mobile

device for access to the secured area. To gain access to the secured area, the mobile boarding pass is scanned. Subsequently, the same mobile boarding pass provides for personal bodily access to the plane for the booked flight. To gain access to the plane, the mobile boarding pass is scanned.

55. Aeritas has been damaged by Defendant's infringing activities.

**COUNT VII**  
**(Infringement of U.S. Patent No. 7,209,903)**

56. Aeritas incorporates paragraphs 1 through 7 as though fully set forth herein.

57. Plaintiff is the owner, by assignment, of U.S. Patent No. 7,209,903 (the "903 Patent"), entitled METHOD AND SYSTEM FOR FACILITATION OF WIRELESS E\_COMMERCE TRANSACTIONS, which issued on April 24, 2007. A copy of the '903 Patent is attached as Exhibit PX-903.

58. The '903 Patent is valid, enforceable, and was duly issued in full compliance with Title 35 of the United States Code.

59. Defendant has been and is now infringing one or more claims of the '903 Patent under 35 U.S.C. § 271 by making and using the Cathay Pacific App with users' iOS and Android devices in the United States without authority.

60. Defendant has also infringed the '903 Patent by encouraging users of the Cathay Pacific App to use the user's iOS or Android devices with the Cathay Pacific App to practice the claims of the '903 Patent. Defendant has notice of the '903 Patent at least as of the date of service of this complaint.

61. Claim 22 recites:

22. A method facilitating a wireless transaction, said transaction involving a payment obligation on behalf of a requester and a fulfillment obligation on behalf of a provider to provide a product or service, comprising:

receiving, by a transaction fulfillment system, a transaction request for a product or service from a transaction requester that has indicated an acceptance of an obligation to pay for said product or service;

verifying an identity of the transaction requester;

communicating a transaction code from the transaction fulfillment system to a wireless communication device after verifying the identity of the transaction requester, said code representative of said transaction requested;

optically scanning, by the transaction fulfillment system, the transaction code from a visual display of the wireless communication device in fulfillment of said transaction for a product or service; and

triggering, by said transaction fulfillment system, a wireless transaction fulfillment event in response to optically scanning said first transaction code whereby said provider fulfills said obligation to provide said product or service and said requested product or service is received.

62. More particularly, Defendant infringes at least claim 2 of the '903 Patent. On information and belief, when used, the Cathay Pacific mobile app receives a transaction request associated with the reservation and purchase of a boarding pass for air travel. In the process of booking air travel, the user provides user identification information, which is verified. The mobile boarding pass provides for personal bodily access to a plane. The mobile boarding pass includes a two-dimensional bar code image, which is displayable by the mobile device for access to a plane for travel. To gain access to the plane, the mobile boarding pass is scanned.

63. Aeritas has been damaged by Defendant's infringing activities.

#### **PRAYER FOR RELIEF**

WHEREFORE, Plaintiff respectfully requests the Court enter judgment against Defendant:

1. declaring that the Defendant has infringed the '819, the '160, the '435, the '107, the '364, the '589, and the '903 Patents;
2. awarding Plaintiff its damages suffered as a result of Defendant's infringement of the '819, the '160, the '435, the '107, the '364, the '589, and the '903 Patents;
3. awarding Plaintiff its costs, attorneys' fees, expenses, and interest; and
4. granting Plaintiff such further relief as the Court finds appropriate.

#### **JURY DEMAND**

Plaintiff demands trial by jury, Under Fed. R. Civ. P. 38.
